APECRON

Blockchain Innovations, LLC

01

Introduction and Mission

There are many token tracking and trading options to choose from. All of them provide useful information and tools to manage your portfolio, but many of them lack features, or a refined and intuitive interface...

The experienced development team at Apecron has researched and created our own custom platform using the best qualities from many websites, improving and combining them into one lightning fast reliable platform, while also adding unique features of our own!

So simple to use, the beginner trader will be able to navigate the dashboard with ease, yet with many customization options available to suit the needs of the seasoned professional trader.

Developing the core platform for the Apecron ecosystem is just the first step. Upgrades and new features will be added regularly, as well as expansion of the real world utility to provide the most comprehensive and advanced portfolio management platform on Cronos, neatly packed in one modern interface... All while rewarding the APECRON holder every step of the way!

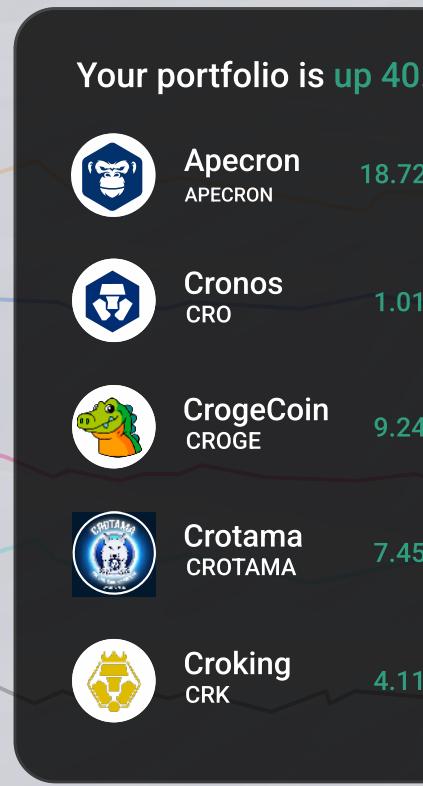

02

Core Features

↳ PORTFOLIO TRACKING MADE EASY!

With built-in wallet management, chart tracking, trading management, and an easy-to-use built-in DEX, managing your portfolio is simple, easy, and takes the hard work out of the equation, giving you more insights to your cryptocurrency investments!

Simply connect your wallet to view all owned tokens to easily track/trade your portfolio including multiple wallets! Search or explore any token on the CRO network and trade right from the dashboard quickly and easily with no additional fee.

↳ LAUNCHPAD

A key component to the Apecron Ecosystem will be around the **LAUNCHPAD**. Creating an ecosystem for investors that is safe and aimed to deliver top quality projects in the space, the Apecron Launchpad will empower everyone with fully vetted and verified / doxxed projects that launch in the crypto space. Initially for Cronos, this will become available across chains and offer a safe, secure place to invest in the latest crypto and helping you find the gems before they MOON! Additionally, it is planned to offer Apecron investors a supply of launched project's tokens based on their holding percentage. More to come on this feature! Launchpad will be available to all professional projects willing to meet the terms that ensure a safe launch and success for the project and its investors.

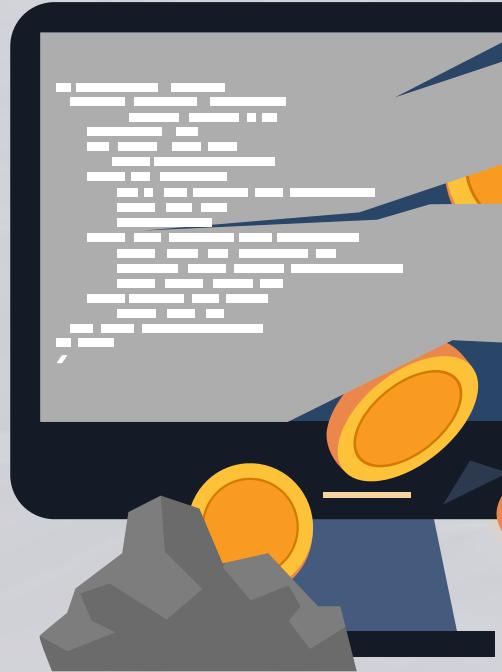

02

Core Features

↳ YIELD FARMING / STAKING

With our partnered yield farm token, any project can use the Apecron platform to provide rewards for their holders right from the dashboard.

In addition, Apecron plans to offer Yield Farming and Staking as an additional benefit to investors. This is going to enable further build out of the Apecron ecosystem and deliver an unbreakable solution for all types of investors!

↳ NEW PAIR EXPLORER + CONTRACT SCANNER

Finding that promising new token listing can be difficult, but Apecron makes it easy to see the contract's scam rating and ape into any new token right when it's deployed. This will be available and separate from our launchpad and is an added tool for investors and their research of projects. While launchpad projects will always be safest due to the process of listing, this feature enables a base for investors to begin their research on projects.

We will also launch an ApelIndex Score that will also give added insight into projects. Remember, always be sure to **do your own research!**

02

Core Features

↳ FEATURED PROJECTS AND ADS

We love helping other projects succeed in the space, but love giving our investors even more solid plays and projects through additional vetting processes. We will offer strategic partnerships that will be available for projects looking to pursue advanced exposure and outreach with our wide reaching audience of investors.

In addition, any advertising space we plan to help the utility and project grow thru a unique system designed to funnel profits back to holders of Apecron through various rewards and airdrops to provide even more benefits of being a part of our ecosystem.

↳ PROJECT ENGAGEMENT

Upvotes, descriptions, links, the whole bag of bananas! Apecron's easy to use platform will provide advanced views and engagements allowing for users to share their view of a project through upvoting and other interactive elements, discussions and community engagement, learn detailed information from descriptions, to social profiles, to verified contract addresses and much more.

This mode of transparency and engagement will allow both projects and investors a safe space to openly engage and build a thriving community.

Apecron will deliver more project specific content than any other outlet to help the user make informed decisions about potential investments without having to search multiple websites.

02

Core Features

↳ NFTS & MARKETPLACE

Who else loves NFTs? We sure do! We plan to release our own unique NFTs with utilities that benefits both investors of Apecron as well as the holders of the NFTs. The utility aspect will be an evolving part of our ecosystem and additional details will be shared as we further expand into the world of NFTs and the metaverse.

In addition, Apecron will launch a revolutionary marketplace that will be a safe platform for buying, selling, and trading NFT collectibles while also providing our investors rewards from the process! Stay tuned for more to come!

↳ SOCIAL MEDIA AND CALL GROUP

Tired of missing the next best thing or not finding that hidden gem that was SAFU? Don't worry, we're here to help with that! New and promising SAFU projects can use our network of marketing partners to greatly increase exposure with a built in social media platform.

All users can discuss relevant information on a project's page or in general chat and hear about the next moonshot at Apecron first!

No longer will you feel you have to FOMO, but instead you can use our platform to do your own research in an easy to use and safe environment while still giving you tons of opportunities to find a great entry! Best part, stay connected and subscribe to be notified of new and upcoming projects, releases, and be a head of the curve!

02

Core Features

↳ TOKEN LOCKER AND SECURITY

The **Apecron Token Locker** ensures that liquidity and team tokens are safely locked and is very easy to view, all at a competitive price to other options.

We are also focused extensively to provide word-class cyber security across all of our products. Utilizing the latest and best in class technology, we ensure all data is encrypted and none of your financial information is ever stored or managed thru our ecosystem. **All financial crypto information is stored securely only on the blockchain** and we will NEVER ask you for any data such as key phrases!

↳ CONTRACT AUDITS

We're more than just a platform, we are aimed at keeping you and your financial investments protected. We will partner with industry experts along with our in house professionals, to provide an extensive Apecron audit process that will provide a comprehensive review of a token's contract and its team and publish the results, increasing investor trust.

We pride ourselves on the trust and transparency we establish with our community and investors, and plan to deliver even greater trust thru mechanisms that will detect and focus to prevent scams, rug pulls, honey pots, and much more! Sleep easy knowing your investments and information is **safe, secure, and private!**

03

State of the Token

The APECRON token will have many uses within the ecosystem. The purpose of the token is to provide endless growth as adoption of the platform increases.

An ever rising token value and steady stream of rewards from advertising revenue, launchpad tokens and partnered staking platform will encourage even the avid day trader to hold long term! These diamond holders will receive more than the total value of their token in dividends over time without selling a single APECRON token from the many services the platform offers.

TOKENOMICS

➔ **Total Supply:** 1,000,000,000 - 1 billion

➔ **Max Wallet:** 10,000,000 - 10 million

9% TOTAL BUY/SELL TAX

➔ **5% Liquidity** - will be used for auto liquidity

➔ **2% Marketing** - will be used for spreading the word of Apecron

➔ **2% DevOps** - will be used for development and operations

03

State of the Token

LAUNCHPAD TOKEN REWARDS

The Apecron project launchpad plans to reward holders and investors in the Apecron ecosystem with an additional line of **passive income!** We will reserve 3% of the partner token's supply for APECRON holders proportionate to the amount of APECRON held! Tokens will be released over time and are able to be claimed from the dashboard! This feature alone gives investors a stream added income without ever spending a dime or **selling a single \$APECRON token.**

ADVERTISING REWARDS

A portion of all advertising revenue will be awarded to APECRON holders and are able to be claimed monthly from the dashboard!

STAKING/YIELD FARM

Apecron's partnered staking rewards will encourage long term holding while providing an unparalleled and sustainable stream of income!

BUYBACK/BURN/ADD LP

We will allocate funds towards buybacks to counter negative pressure on the chart, then burn those tokens and further increasing the price of each token by reducing supply or adding them to liquidity.

CONTRACT ADDRESS

0X09AAE6C66BC670016801E34D19B1775B038B6C43

(Note, there may transaction fees for claiming or selling such as gas fees per the network).

APECRON

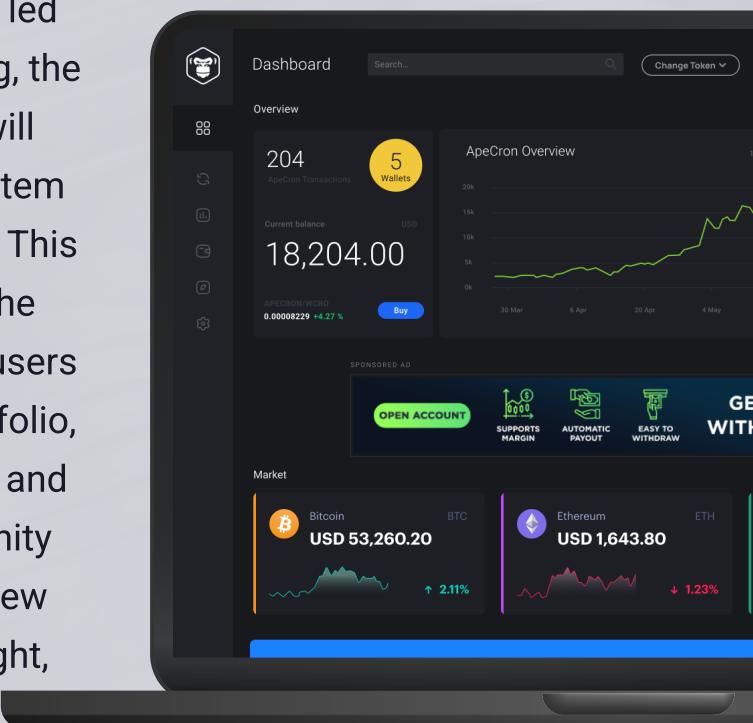

Blockchain Innovations, LLC

04

The Platform

The Apecron platform will consist of an easy to use, secure, and fast application that will utilize the latest technology and industry standards to deliver an immersive user experience that will change the DeFi space.

With an emphasis on user experience led by world-class design and engineering, the Apecron dashboard and central hub will provide the base for the entire ecosystem of products and utilities for investors. This central hub will be the foundation of the Apecron ecosystem and will provide users with the tools for managing their portfolio, tracking their wallet(s), seeing tokens and data in real-time, engaging in community and centralized discussions, finding new tokens thru our new token pair, spotlight, participate in yield farms, utilize

a built-in DEX for easy swapping of tokens, and accessing many more features including our state of the art Launchpad experience to find new projects and partnerships. Don't be fooled by it's sleek and simple design, the platform is designed to make it easy for you to manage your entire crypto porfolio in one centralized place!

05

The Launchpad

The Apecron Launchpad will be a game changer for DeFi, fixing the issues in today's industry and creating a secure place for project launches while rewarding our holders!

There are many issues with the environment that today's most popular DeFi launchpads create. From scams and rug pulls to poorly executed launches and exposure for projects. There needs to be a place that balances all aspects to create a safe and secure environment and process to help establish trust in the crypto and DeFi space.

SECURITY

Even when a project owner KYC's, there is still the potential of a scam and we have identified and hope to provide a solution for the key ways that they are able to do this.

There can be hidden malicious functions within the token contract that raise the tax, syphon liquidity or prevent selling just to name a few. We at Apecron will use our network of reputable audit partners to identify these potential threats and in turn, an attempt at preventing them.

Each token contract **MUST** be audited by one on our verified list of comprehensive audit service providers and we will red flag any potential threat to investors and reserve the right to prevent any launch from proceeding if we at Apecron feel there is risk. This is to encourage that only honest, committed teams launch under the Apecron brand!

05

The Launchpad

TEAM TOKENS

This is another method used to take advantage of the investor. If a project decides to have team tokens there will be a maximum of 5% total supply allowed and the vesting period will be 9% of these tokens per month over 11 months, claimed by the project contract owner from our dashboard. That is roughly 0.4% of total supply per month if the project chooses the maximum 5% of total supply.

The goal and aim is to provide stability and protection not just for the investor but for the project as well!

A black and white photograph of an astronaut in a full space suit standing on the surface of the moon. The astronaut's helmet reflects the bright sunlight. The lunar surface is covered in craters and rocks. In the background, the dark void of space and the Earth's horizon are visible.

05

The Launchpad

WHITELISTS AND PRIVATE SALES

Generally, private sales are how the team and their friends load up on multiple wallets at a discounted rate so that these tokens have an advantage over the average investor at launch and the likelihood to dump on them, hurting the investment. We realize this isn't always the case, but to prevent the possibility and promote a fair environment, private sales are not welcome at Apecron. Any project that wishes to use the Apecron Launchpad will be prohibited from having a private sale allocation in token supply.

Whitelisted presales are another way that projects can abuse exclusivity to give some advantage over others. At Apecron, we believe in fairness and every launch will be a fair launch. The project owner can either choose, in any combination, a maximum contribution amount, maximum total \$ amount for the presale, or launch with no cap to either and only have a countdown timer to the presale's close.

All of these measures in place are to promote a platform that is fair across the board full of legitimate projects with a dedicated and professional team, rather than an endless cycle of pump and dumps. Any project that meets these requirements are welcome to list their project with Apecron, though this model favors those with real utility and innovation.

05

The Launchpad

HOLDER BENEFITS

Once a project is approved to list on the Apecron Launchpad, there is a 1 week listing period before the presale goes live. This allows the time for the project to line up marketing and give the opportunity for Apecron investors the guaranteed chance to invest. Not at an advantage, but rather to ensure that holders of **Apecron** don't miss the opportunity if a presale fills quickly.

25% of the presale cap will be available for Apecron investors in that week between listing and presale launch, proportionate to the amount of **\$APECRON** an investor holds. The reserved tokens for anyone who chooses not to invest will be automatically rolled into the presale launch. This added measure in place ensures that the Apecron investors and community members can support the new project!

05

The Launchpad

LAUNCHPAD EXAMPLE SCENARIO

Say, if someone holds 1% of Apecron total supply, they are eligible to invest in 1% of the available 25% of tokens reserved in this way, or a total of .25% of the tokens available at launch. They can then choose to increase their investment once the presale is live up to the max purchase cap set by the team.

3% of the new token's supply is reserved for Apecron holders.... Other presale launchpads do something similar, but generally the launchpad team keeps and sells these tokens, hurting the project that chose their platform!

Apecron will instead give these tokens to it's holders, providing an endless stream of rewards and passive income while providing a wide reaching interest in what is upcoming! Airdrops are usually an expensive service and increase awareness, holder count, vested interest and excitement for the project to join the family, but at Apecron this service is free and included! Tokens can be claimed from the dashboard as they are released over the vesting period, or Apecron holders can choose to let them accrue over time and claim all of them once the vesting period ends. 10% of tokens will be disbursed weekly starting 3 days after launch. This is to ensure that any vested token sells do not impact the chart and in turn hurt the project we are trying to support!

06

The Future of DeFi

We are not here to provide the services people are used to. Instead, we aim to innovate and change the space of DeFi forever!

We will do this by providing a world class ecosystem that promotes quality content, where instead of broken and separated, people can come to one place to easily learn everything necessary to make informed investment decisions free of charge.

PRE LAUNCH - THE NEW WEBSITE

The team is working to deliver a robust and user focused redesigned website that is aimed to delivering on brand product that will be a foundation for all marketing efforts and help drive the launch of the ecosystem and platform! The new website will provide investors with a clear, easy to use and understand experience that will further the core efforts for the project and allow for a seamless delivery.

PHASE 1 - ROLLOUT OF THE PLATFORM (BETA)

The core beta platform will include chart tracking and trading with portfolio management via wallet connectivity. Many features will be added and updated regularly as they are ready including project scam rating, multiple wallet tracking, trade transactions on chart, project descriptions, social media platform, etc.

06

The Future of DeFi

PHASE 2 - INCREASED TARGETED MARKETING

With the launch of the new website and rollout of the platform, the team will begin full on marketing to drive awareness, bring new investors, and share the amazing utility with the world! We will focus on marketing to the right advertising channels and platforms to maximize exposure while ensure to minimize money spent!

PHASE 3 PART 1- ROLLOUT OF THE APECRON LAUNCHPAD (BETA)

The Launchpad will be the premiere vehicle that new Cronos projects will be using to gain an immediate following of vested Apecron community members, as well as exposure to many new investors.

PHASE 3 PART 2- STAKING PARTNERSHIP

Apecron's staking partner provides long term value for any project that wishes to reward their investors.

PHASE 4 - GOING BEYOND!

If this wealth of content that Apecron brings to the Cronos network and the space of DeFi isn't enough, don't worry. We will continue to refine and upgrade all aspects of the ecosystem and expand the use case and adoption to reach all corners of cryptocurrency! We will conduct user feedback studies to improve the product while staying on top of trends and latest standards to deliver more for our investors! If that's not enough, we have other projects that we plan to launch into our ecosystem through our launchpad and giving even more to our investors!

Leadership Team

Meet the team behind Apecron.

BRANDON

CEO of Apecron and founder of Blockchain Innovations, LLC. Brandon is an entrepreneur and visionary, delivering ideas that will shake up the DeFi space. He focuses on the operation of Apecron and leading efforts on the marketing and business aspects of the project.

RAASHID

Founder of Apecron and lead developer, Raashid has 14+ years of experience with 5+ years of blockchain development experience. Raashid is driving the project's development operations and ensuring the security of the platforms developed.

KAROLINE

Head of marketing and community management, Karoline works to deliver strong tailored growth for the platform, organizes raids, and engages the community through many various aspects that drive organic growth like nothing seen before!

MARK

Senior developer and UX designer, many have called him a unicorn due to his unique skillset and ability to deliver both solid, secure, and performant code while creating unique and user focused interface designs. Mark has 15+ years of development experience, holds a M.S. in Internet Marketing, a B.S. in Development, and has achieved his User Experience Certification (UXC) from Nielsen Norman Group.
